

Álvaro Moreno Sevilla

Biotechnologist | Data Analyst | PowerBI Developer

 LinkedIn |  alvaromoreno99@gmail.com |  Portfolio |  GitHub

 St. Santa Virgilia, Madrid, Spain | Birth date 05/07/1999 ~ Spaniard

About me

As a **biotechnology** graduate, I specialized in **industrial bioprocesses** and project management, however, I am still keen on genetics and biomedicine, and I try to be up to date with new advancements. Furthermore, going through university my interest in **computer science** led me to learn Python and PowerBI on my own, which combined with the knowledge of Excel, R and SQL that I acquired in the degree, makes me a versatile **scientist** and **data analyst**.

Experience

Sales Analyst – Kenvue – J&J ~ (10/2023 – 10/2024)

• Data analysis

- **Extraction** and **formatting** of useful data from Redshift and Snowflake using **SQL** queries and **PowerQuery**.
- **Modelling** and **transformation** of sales data using **DAX**, and optimization of previous models in **Power BI**.
- **Creation and enhancement of dashboards** for sales representatives, pharmacy visitors, and distribution managers; integrating tables, matrix, visuals (+**DENE**B and **SVG** graphs based on HTML), and indicators.

• Implementation of business management tools

- Implementation, execution, and training of sales teams on business management tools like **Kantar XTEL**.
- Unification and integration of **B2B** transaction system, customers' planning, channels' sales, and **CRM** (accrual-based accounting), and improvement of the reconciliation between **demand** and **sales forecasts**.

• Analytical assistance to other departments

- Analytical support to other departments using the aforementioned tools, **SAP**, and **Excel**; such as the Revenue Growth Management (RGM) team, E-commerce, Demand planning or Customer Service.

Technical Skills

Data Analysis: Power BI | Excel | Python | SQL | Kantar Xtel | R | Tableau | Power Apps | Power Automate

Libraries & Frameworks for Py: Numpy | SciPy | Pandas | Polars | Matplotlib | Seaborn | Biopython | Scrappy

Others: MS Suite 365 | SuperPro Designer | ASPEN Plus | SPSS | Matlab | SciDavis | Jira | Trello | SAP BW

Languages: English | French | Spanish – All C1 level or above (Diplomas in LinkedIn)

Education

• Biotechnology Bachelor's Degree ~ University of Granada

(09/2018 – 06/2023)

Industrial mention ~ Industrial bioprocesses | Thesis: Industrial bio-production of gluconic acid

• Big data & Data science Master's Degree ~ University Complutense of Madrid

(Start: 02/2025)

Projects

- **House pricing analysis** using **Python** and its multiple libraries to find out influential variables over the sale price and, applying regression algorithms, trying to forecast it in the future within the same context.

- **Gantt Chart App:** implement an app-like Gantt Chart natively in **Excel** with features inspired by Jira.

- **Ecommerce Sales analysis (Consumer Health)** using **Power BI** for extraction and formatting of useful data; and its modelling, transformation with **DAX**, calculations creation and visualization.
